FAMILY

Willa's sister Davi was kidnapped alongside Willa when the two were younger, but they were parceled out to different mercenaries. Willa has no idea who the group was that took Davi, nor where they took her when they left Ryloth. Willa doesn't even know who the mercs she wound up with were, as she was passed off to an intermediary before winding up in Rakka's possession. She has no leads to follow, but nonetheless is constantly on the lookout for any sign of her sister, or the mercs who stole her.

STORY

Willa grew up on Ryloth, under Imperial occupation for the most part. She was always a bright girl, with a fondness for the antiquated utility droid her family kept. She grew up learning to tinker, fascinated by how simple it was to make substantial improvements on mechanical things just by replacing parts and adjusting things like timing and redundancy. She had a decent childhood, even if there was a steady fear of the occupiers who lived among them, as well as the unscrupulous types who did business with them. Willa knew more than one friend or cousin who simply disappeared, never to be heard from again. Even so, she never really expected to be one of those number herself. Yet when she was sixteen, just before the Empire abandoned its garrisons on Ryloth, trouble found her.

Mercenaries raided her village. She saw her parents shot down while Willa, her sister Davi, and several of their friends were rounded up and taken prisoner. They were drugged for easy transport, and the next thing Willa knew, she was very far from Ryloth. The cohort of stolen girls had been split up while they'd been unconscious, and to Willa's horror she found her sister gone, with no way to find out where she'd been sent. Willa herself was taken with some of the other girls straight to auction. She sold quickly, but to another slave trader, who took her to yet another urban backwater to broker her sale into private possession. She was bought with a number of other girls and taken to the palace of a Hutt named Rakka on Nar Shadaa, where she was made into a serving girl at a club Rakka owned.

Through it all, Willa counseled herself to be patient. She had always been smart, and had rarely encountered a problem she couldn't handle if given enough time to map out a solution. The situation she found herself in was more daunting and dangerous than anything she'd known before, but she assured herself there was a way out. There HAD to be. She couldn't stomach the idea of never escaping to find Davi. Willa's situation at the Hutt's club wasn't ideal, but it was a far sight better than the horror stories she'd heard about where some Twi'lek girls wound up. The worst of Willa's days included being screamed at or propositioned by "customers", but the Hutt had clear lines about her guests crossing lines with "her" property. Willa kept her head down, and so long as she didn't draw attention to herself, Rakka seemed content to let her remain solidly within the realm of wait staff. She prayed nightly that she was never made to transition into "entertainment" staff. She wasn't free, and she received no compensation for the exhausting work she did during the nights. But during the day she was mostly left alone, so long as she stayed in the parts of the palace she was allowed to be in, and kept her head down. There were a number of droids about the palace with whom she could entertain herself, and she taught herself a great deal in those years about the different kinds of droids and how to keep them up.

Willa would later find out that it was her tendency to patch up the droids around her that had been her saving grace. The Hutt's majordomo, a Weequay named Gorel, noticed her aptitude and took pains to keep her available for that purpose. Over time, the two developed an odd and strained friendship of sorts. Gorel had been enslaved as a youth by the Hutts as well. Though he'd climbed the ranks over his life and was now firmly embedded into Rakka's empire willingly, he wasn't without sympathy for the plight of the Twi'leks. Willa's doomed hope to find her lost sister played on Gorel's own history of lost siblings, and eventually he secretly broke ranks to help Willa escape. She nearly made it to freedom, but one of Rakka's informants recognized the girl when she was booking passage off world. Rakka sent her enforcers, and ultimately had the transport Willa was in blown up to make her point.

Though most thought her dead, Willa barely managed to survive. She lost an arm and both legs in the explosion, and would have certainly perished had it not been for one of Nar Shadaa's unfortunates. A beggar had begun to rifle through what was left of her pockets before realizing she somehow wasn't dead. Feeling guilty, he carried her to a doctor living in hiding in the underground, and her life was saved. It was this doctor, a Twi'lek man named Vo, who outfitted Willa with her first prosthetic limbs. They were crude and homemade, but they allowed Willa to reclaim the mobility she'd lost. It was a long, slow, and difficult climb out of despair and pain for the young Twi'lek, but she was determined. She learned medicine from Vo, for whom she eventually developed a deep affection. She picked up some other skills over the years as well, in pursuit of tinkering with the mechanics that were now part of her own body. In her search for smarter cybernetics, she picked up skills with slicing computers, and it was this, paired with her outstanding intellect, which got her an offer to join a mercenary group doing a job off world. Willa was torn. She had come to enjoy the life she'd made in the underground, and the idea of joining mercenaries was utterly distasteful. Vo was adamantly against leaving as well, but Willa knew she'd never find Davi if she stayed where she was. It was only after a great deal of thought and a with a heavy heart that she finally said goodbye to the friends she'd made and joined the mercenary band. How else would she ever find the people who'd kidnapped her and her sister all those years ago, except by traveling in those kinds of circles?

It's been a few years now, and though Willa has learned a lot more than she ever imagined she would, she's begun to lose hope that she'll ever see her sister again. With no leads to follow, she freelances among various groups, going where the money leads while trying to cause as much havoc for the Empire's remnant as she can along way.
